

## Message from the President

May 2018

Colleagues,

As you know, this year we commence hosting our World Congress of Psychiatry annually and I am delighted to share with you details on how you can promote this important event through your networks.

The WPA is pleased to be partnering with our member society, the Asociación Psiquiátrica Mexicana, to bring together world leaders in psychiatry to discuss emigration, suicide, violence, new addictions, poverty and many other issues key to the mental health agenda the world over. The meeting will take place 27-30 September 2018 in colourful Mexico City.

You can [download key promotional material](#) including banners for emails and letterhead, adverts, marketing text and a promotional slide for inclusion in any presentations you might give between now and the Congress. You can also find further information on the event – and register your own attendance – on the [Congress website](#).

Thank you sharing this information widely with your colleagues, members and partners and for using it yourselves in coming months. Building a diverse group of attendees to the meeting will help to ensure a high quality of discussions with broad perspectives and more opportunities for sharing and learning across borders.

We look forward to seeing you in Mexico City!

Best wishes  
Helen

**Professor Helen Herrman AO**  
President, World Psychiatric Association
