

## **World Psychiatric Association**

### **Executive Board**

**S/D**

My name is Manuel Vilapriño. I am a physician specialized in Psychiatry, of Argentine nationality, and a member of the Argentine Association of Psychiatrists, of which I have had the honor of serving as President.

I am currently the Director of Mental Health of the Province of Mendoza, where I live and carry out my professional activity, in addition to the aforementioned role, as a Clinical Psychiatrist, university lecturer, and researcher. I work in both public and private mental health sectors.

The opportunity to be part of a scientific association such as APSA, together with my role in different areas as a psychiatrist, motivates my desire to apply as a representative of Zone 5 in the World Psychiatric Association. I am driven by the firm objective of contributing to the leadership of the association in promoting the integration of the region into the guidelines established by the World Association at the academic, scientific, and clinical levels, bringing the perspective and voice of colleagues from the aforementioned region.

Without further ado, I remain yours sincerely.

**Dr. Manuel Vilapriño**  
Médico Psiquiatra  
Mat. 6984
