

# President-Elect Work Intentions

I seek the President-Elect role to deliver dynamic, collaborative, inclusive leadership amid rapidly evolving needs of WPA Member Societies and the populations they serve.

## Key Priorities

- Strengthen WPA Secretariat for enhanced capacity and institutional memory.
- Promote inclusivity and diversity across policy, education, and clinical practice.
- Disseminate cutting-edge, compassionate care standards globally.
- Build capacity for underserved populations with timely, culturally appropriate services.
- Support Member Societies to advocate for  $\geq 10\%$  health budgets to mental health/addictions (serving 20-30% of populations).
- Align WPA initiatives with UN Sustainable Development Goals.
- Sustain support for local/regional advances in WPA values.
- Foster bidirectional knowledge transfer via Member Societies.
- Expand multilingual, user-friendly WPA resources for all populations.
- Empower Action Groups, Working Groups, and Sections for interactive impact.
- Secure funding for mental health professional training.
- Elevate psychiatry's image through timely, affordable, accessible care with dignity worldwide.

I am honored to contribute and eager to advance this vital mission.
